

HEALTHCARE INSIGHT® AND EZ-CAP® FORM STRATEGIC ALLIANCE TO IMPROVE CLAIMS PAYMENT ACCURACY AND PREVENT FRAUD

HealthCare Insight's Hands-On Clinical Analysis is Combined with EZ-CAP® Benefit Administration Software to Provide a Comprehensive Cost Containment Solution

SALT LAKE CITY and VALENCIA, Calif., June 27, 2007 — To help benefit administrators improve payment accuracy and prevent unnecessary losses associated with fraudulent claims, HealthCare Insight® (HCI www.hcinsight.com), the clinical review and fraud analysis authority, has formed a strategic alliance with EZ-CAP® (www.ez-cap.com), the flagship product of MZI HealthCare, LLC (MZIHC), a leading provider of health plan administration software.

The alliance offers health care payors a new service to detect potential fraud. The combination of EZ-CAP's benefit and claims adjudication software, which provides instant access to data, coupled with HCI's clinical review and fraud analysis services that identify outliers, decreasing overpayments, and detect potential fraud schemes, will help to reduce payors' medical expenses and lower their cost ratios.

“Our alliance with HealthCare Insight® complements EZ-CAP's services,” said Darryl Low, president of MZIHC. “We will be able to offer our clients a unique interface to identify and prevent healthcare fraud which will make it possible for them to reduce their medical cost ratios, enabling them to be more profitable.”

Using an interface, developed by EZ-CAP® and HCI, EZ-CAP® extracts data and sends it to HCI where the data is evaluated through HCI's code editing and fraud identification software systems. Claims flagged as suspect are then analyzed by HCI's clinical experts for validation and recommendations. EZ-CAP® clients review the recommendations from HCI and are empowered to either accept or reject its recommendations. Accepted items are written to a file that is downloaded to EZ-CAP® through the interface.

EZ-CAP® is a comprehensive, integrated benefit administration system that manages multiple lines of business from a single, integrated database, and supports day-to-day business operations for many different types of organizations, including HMOs, MSOs, PHOs, IPAs, TPAs, specialty service organizations, medical groups, self-funded organizations, hospitals, and government-sponsored health plans.

HealthCare Insight® is a prepayment fraud, abuse and overpayment prevention service that combines Code Validator Pro™ and Fraud Finder Pro™ software systems with detailed hands-on review by clinical coding specialists that analyze suspect claims. The analysis includes a thorough review of patient and provider historical information, national databases, and peer-provider comparisons. This unique combination of human and system review delivers increased payment accuracy and significant cost savings. Managed care organizations, Medicaid payers, insurance companies, and TPAs of all sizes currently employ HCI's services.

“Together, EZ-CAP® and HCI provide payors and administrators with a comprehensive end-to-end solution of software and services to automate and improve health care administration productivity and identify and prevent health care fraud, abuse, and overpayment,” said Ken Lamé, managing partner and chairman of the board at HealthCare Insight®. “EZ-CAP® is an ideal partner and I am confident that our collaboration will be the answer that benefit administrators have been waiting for to help reduce inappropriate payments and improve their bottom line performance.”

About HealthCare Insight® (HCI)

HCI provides health care claims payors with a comprehensive suite of cost reduction services focused on identifying and preventing health care fraud, abuse and overpayments. Implementing HCI’s entire line of technologically superior services can deliver savings up to \$10 per member per month (PMPM). Each of HCI’s services rely on a sophisticated prevention process that combines cutting edge Code Validator Pro™ and Fraud Finder Pro™ software systems with detailed review by Clinical Coding Specialists and a Clinical Investigative Unit (CIU) on 100% of suspect claims and billing patterns. This unique combination of human and system review creates a service unlike any other in the industry and provides payors with unsurpassed support and claims payment accuracy. HCI’s services are seamlessly integrated into all claims adjudication operations and are affordable for payors of all sizes. For more information and your free Cost Reduction Analysis (CRA) please visit HCI online at www.heinsight.com or call 1-800-357-7781.
